

HARRY BEAUMONT

Interior Architecture + Design

- PROFILE -

I am a highly motivated young designer who works well independently but also in group work. Graduating this spring from Sheffield Hallam I am looking for work to help gain invaluable experience to help grow my skills and learn new ones.

- SKILLS -

Vectorworks	● ● ● ● ○
Photoshop	● ● ○ ○ ○
Technical Drawings	● ● ● ● ○
Sketch Up	● ● ● ● ○
Hand Drawings	● ● ● ○ ○

This is only a handful of software's I have used as I am constantly trying new software's. With the likes of Vray and other rendering software's.

- ACHIEVEMENTS -

College Competition

In my final year of college, I represented my college in one of two teams of three in a design build competition against of local colleges, placing 2nd out of 6 teams.

University Collab / 2020 + 2021

I have had two great opportunities working with cross courses and year groups to help tackle real life problems. Most recently working with YMCA Barnsley to help tackle the Perception around Knife Crime and creating an art installation to help with this.

Independent Software Workshops / 2021

Alongside my studies I have ran two independent Vectorworks workshops for 2nd year students. This included techniques and problem solving when designing within Vectorworks.

2017-2019

GCSE's

8 GCSE's A - C including Maths, English and Science*
Colne Valley High School
2012-2017

- WORK EXPERIENCE -

Assistant Fitter

Shutter Craft Pennine / 2019-Present

I am currently working part time as an assistant on fittings of plantation shutters around West Yorkshire. I have been tasked on most occasions to unbox and fit the frame of shutters together before being set in place. Each shutter and blind I have helped install has helped complement their interiors. I mainly work in finished homes but have also experienced working in new builds, Apartments, and businesses.

Freelance Work

Dunston Staiths " STAITHS FIRE CAMPAIGN" Project

After graduating University, I was lucky enough to be given an opportunity by word of mouth to create a CAD model for the Dunston Staiths in Gateshead. Stretching over 200m long the timber structure was to me modelled in detail, this included me taking a personal site visit to understand the site better.
